Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

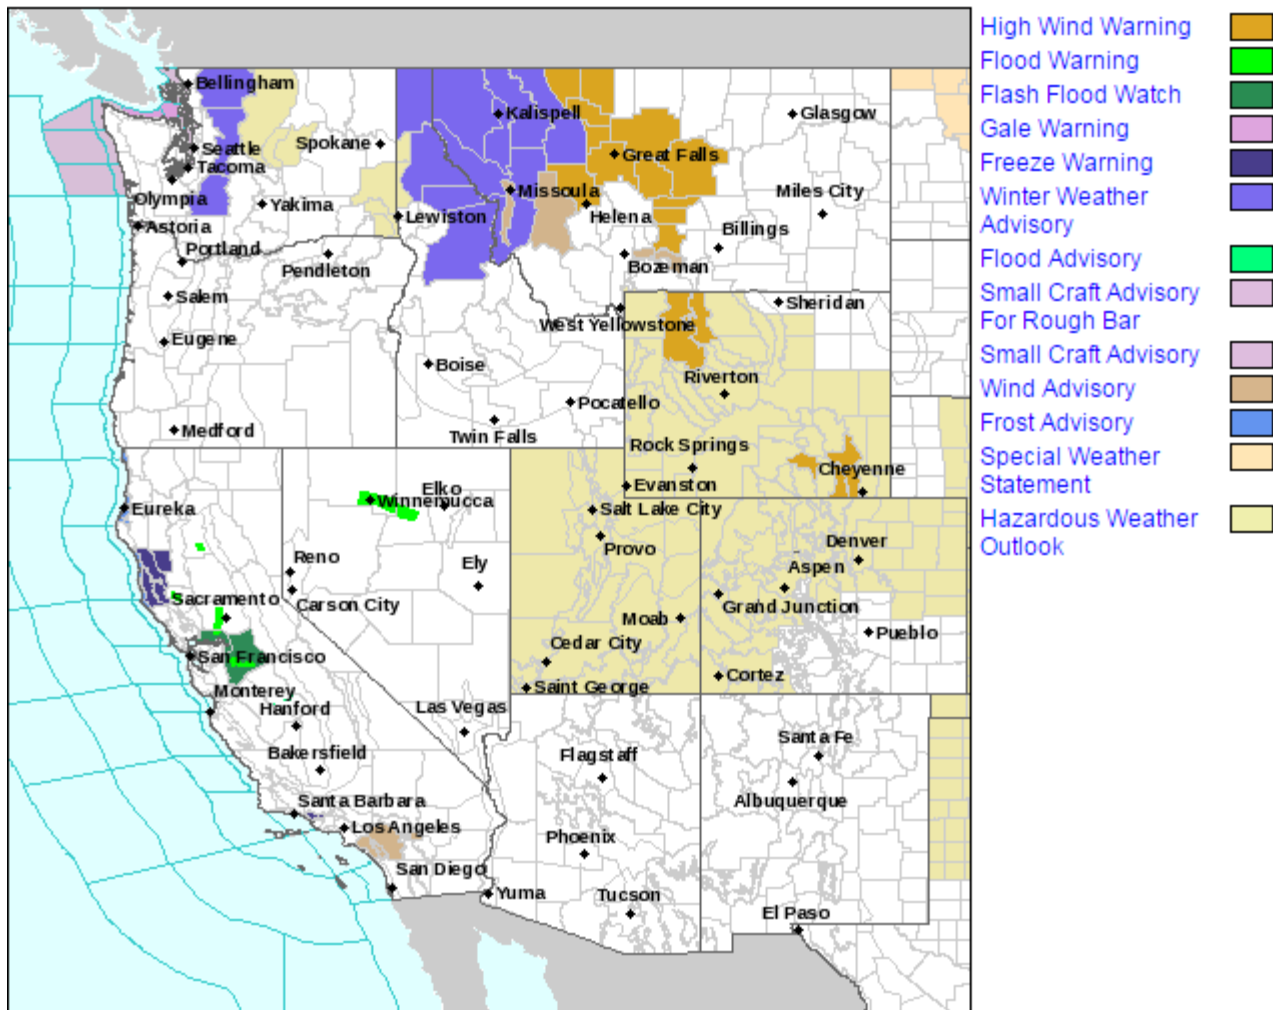

NORTHERN CALIFORNIA

Frosty conditions for early this morning and tonight. Look for a warming trend in the near term as Pacific fair weather high pressure builds across interior Northern California. Scattered showers and cooler temperatures will then be on tap for the weekend period as a low pressure trough drops southward from the Pacific Northwest. Dry weather will prevail through Thursday night as the east Pacific high remains.

SOUTHERN CALIFORNIA

A big ridge of high pressure is building over Southern California brining incredibly clear skies. The high pressure will be responsible for a pronounced warming trend beginning today, then peaking Thursday and Friday. The warmest weather will be in the inland valleys due to periodic moderate offshore flow. Temperatures will reach about 10 degrees above normal with a few reports into the lower 80s likely there.
